

“Commitment to Excellence”

ISO 13485 / AS9100 APPROVED

JANUARY, 2010

JADE IS ADDING CAPACITY.....AGAIN!

As always Jade is constantly staying ahead of the manufacturing curve by adding new equipment and increasing our capacity.

1 - MAZAK VARIAXIS 630-5X II WITH PALLET CHANGER ADDED

The highly-rigid, built-in tilting rotary table, unique to the Variaxis Series, allows workpieces with complex contours and features to be finished in just a single machine setup.

It has tremendous weight capacity and will increase machining accuracy while reducing cycle time. 5-axis, simultaneously controlled machining with Variaxis is ideal for aerospace components as well as prismatic parts in steel and aluminum.

11-TOTAL IN HOUSE 5 AXIS CNC CENTERS

2 -MITSUBISHI # FA20S - WIRE EDM MACHINES ADDED

Wire EDM (wire size down to .004) bringing the total in house capacities to.....

8- TOTAL IN HOUSE WIRE EDM MACHINES

These state of art machines allows Jade to burn hardened steels to ultra close tolerances.

1 - WATER JET MACHINE

Water jet technology allows Jade to rough out complex geometries off line followed by finishing in 5 axis centers.

Increasing our 5 Axis capacity.
